

March 23, 2020

The Honorable Debbie Stabenow
731 Hart Senate Office Building
United States Senate
Washington, D.C. 20510

Dear Senator Stabenow,

My name is Cindy Hollenbeck and I am writing to you to consider including wellness industries in any COVID-19 economic relief package. I am President and Owner of the World Halotherapy Association (WHA) which is a global association that trains, educates and supports Haloprenuers in a deeper understanding of the disease state in which halotherapy may help and aid in the successful execution of business operations.

I am not worried about my business, WHA, but more the stability of the wellness industry which halotherapy is part of and is becoming an important modality. There are many European studies that show the effectiveness of halotherapy with respiratory diseases and with COVID-19 being a respiratory virus halotherapy may be of help.

I conducted a pilot study in Michigan (Effect of Halotherapy on Peak Expiratory Flow (PEF) and Forced Expiratory Volume in 1-second (FEV1) in recreational athletes above the age of 40 - Pilot Study) with the following result: In this group FEV1 increased in all study participants. Quality of Life Questionnaire showed improvement in sleep, increased energy during athletic activity and decreased feeling of stress. There are many additional studies in the design phase due to this promising result of halotherapy improving lung function.

The halotherapy industry in the US is just getting started in conducting studies which have been done with successful results in Europe. I ask you to support the halotherapy industry in any COVID-19 economic relief package.

Thank you for taking the time to read this letter.

Kind Regards,

Cynthia Ann Hollenbeck
